EDUCATION

Binghamton University, State University of New York, Harpur College of Arts and Sciences
Bachelor of Science in Financial Economics; Minor in Data Analytics and Computer Science
Cumulative GPA: 3.25/4.00

Vestal, NY
Expected May 2027

TECHNICAL EXPERIENCE

Programming Languages: Python, R, SQL, CSS, HTML, C, JavaScript

Technologies and Skills: Tableau, Power BI, Microsoft Office Suite, Excel, RStudio, Visual Studio Code, Figma

PROFESSIONAL EXPERIENCE

Northwell Health – LIJ Medical Center, Finance Department
Administrative Intern

Valley Stream, NY
June 2026 - Present

- Modeled the financial relationship between two high-volume imaging service lines (MRI and EKG) and excess inpatient stay days to pinpoint operational bottlenecks, translating data-driven insights into process-efficiency recommendations presented to leadership
- Collaborated with a team of two fellow interns to develop a financial viability model for a strategic blue ocean expansion of the Hyperbaric unit, integrating primary market research with internal utilization data to forecast long-term revenue potential

Glenn G. Bartle Library, Pods/ITS
Technology Consultant Assistant

Binghamton, NY
February 2026 - Present

- Supported 40+ users across a university-wide network by providing high-level technical troubleshooting for hardware and software issues, while managing scheduling for 20+ weekly appointments to ensure consistent system availability and optimal network uptime
- Authored 20+ comprehensive technical documentation and training assets that standardized operational procedures, effectively streamlining complex systems support across a 40-unit university network and significantly reducing average ticket resolution times

Fleishman Career Center at Binghamton University
Data Entry Student Assistant

Binghamton, NY
September 2024 - Present

- Systematically audited and validated 200+ records weekly using advanced Excel workflows to identify and eliminate redundancies, significantly strengthening data integrity to support precision-targeted outreach campaigns across high-volume datasets
- Orchestrated cross-departmental scheduling and digital content management across Office 365, streamlining stakeholder reporting processes to improve organizational visibility and ensure all training initiatives consistently met strict deadlines

PROJECT EXPERIENCE

NYC Socioeconomic Data Visualization Project

October 2025

- Analyzed 100+ socioeconomic data points in Excel to uncover key trends and translate complex research into audience-ready reports, engineering three interactive Tableau dashboards to automate reporting and deliver real-time insights to senior leadership
- Synthesized quantitative findings across three dashboards into high-impact marketing materials, driving measurable improvements in stakeholder engagement with complex socioeconomic data and streamlining program outcome tracking

Sales Performance Analysis Dashboard

August 2025

- Cleaned and structured 15,000+ records using SQL to perform deep-dive analysis and ensure total record integrity, gaining technical skills in relational database management and the automation of manual data workflows
- Built ten Power BI dashboards to track metrics and communicate progress to stakeholders, developing advanced skills in Office 365 and the creation of tools to support training program reporting and documentation
- Synthesized findings into documented deliverables and visual assets to improve administrative efficiency, gaining skills in technical writing, data hygiene, and the visual communication of high-impact programmatic data

LEADERSHIP EXPERIENCE

Barclays Equity Research Case Competition
Competitor

Vestal, NY
Spring 2026

- Conducted comprehensive equity research on Lantheus Holdings (NASDAQ: LNTH), a radiopharmaceutical-focused company, performing DCF modeling, comparable company analysis, and industry trend assessment to generate a BUY recommendation
- Built detailed financial models incorporating WACC calculations (9.8%), revenue projections through 2028, and beta analysis (0.72), resulting in an LNTH price target of \$130.00 representing 25.0% upside potential from the \$104.00 current trading price

ColorStackBU
VP of Marketing

Vestal, NY
May 2024 - May 2025

- Designed 20+ promotional materials and digital assets using Canva and Figma, analyzing performance data to identify high-impact strategies and systematically optimizing execution, resulting in 25% growth in campus presence and online following
- Analyzed performance data to optimize content strategy for 800+ students, driving intern recruitment and member retention

ADDITIONAL INFORMATION

Certifications: Excel Basics for Data Analysis (IBM), SQL for Data Science (UC Davis), Tableau (Binghamton U.), Coding in R (Binghamton U.)
